360-degree virtual engagement room enables community participation in an accessible and flexible manner for proposed Campbellfield Resource Renewal Facility.

1H FY21 Themes

Significantly better results, higher prices, and substantial progress in strategic growth plans

Price recovery driven by limited supply and increased demand in many industrial sectors

- Market prices improved throughout the period, particularly during November and December 2020; however
- 1H FY21 proprietary intake volumes remained at 85% of average FY19 monthly volumes due to COVID-19 impacts but increased 9% compared to 2H FY20 levels

Nearly all financial measures improved during 1H FY21

- Statutory EBIT of \$78.5 million, up \$173.7 million over prior corresponding period
- Underlying EBIT¹ of \$56.4 million, up \$79.6 million over prior corresponding period
- FY21 interim dividend of 12.0 cents per share, fully franked
- Net cash balance of \$165.4 million, up 49.8% on FY20

Substantial progress in strategic growth plans

- Sims Resource Renewal
 - Commercial demonstration confirmed Sims ASR produces a high quality syngas. Next stage gate identifies best outputs from syngas
 - Submitted development application for pilot resource renewal facility in Rocklea Queensland
- Acquired leading aluminium processor, forecasted to grow NAM non-ferrous retail volumes 24%, with strong cultural fit
- Acquired existing purpose built recycling facility in Sydney's rapidly growing Southwest market

1) Underlying earnings excludes significant non-recurring items and the impact of non-qualifying hedges.

Employee Health & Safety

Lowest ever recorded number of injuries

All incidents significantly reduced

Total Recordable Injury Frequency Rate (TRIFR)¹

- Safety remains the most important priority for all stakeholders
- Actual recordable injuries decreased 12% and lost time injuries decreased 11%
- Decrease in hours worked by office based employees, who typically have fewer injuries, impacted the incident rate which increased to 1.7
- Critical Risk Incidents fell 46% compared to the prior corresponding period
 - Focus on Critical Risk Management and mandatory monthly Critical Control Verifications contributed to the continued improvement
 - Over 4,000 Critical Control Verification (CCV) inspections designed to ensure control effectiveness were completed in FY21
 - Over 1,900 opportunities for improvement were identified during CCV inspections with a 94% Corrective Action closure average

1) Defined as total recordable injuries x 200,000 divided by number of hours worked for employees and contractors.

Sustainability

Sustainability goals drive economic, environmental and social value

OPERATE RESPONSIBLY

1	Foster a safe work environment
1.1	Total Recordable Injury Frequency Rate (TRIFR) ≤ 1
1.2	Lost Time Injury Frequency Rate (LTIR) ≤ 0.10
1.3	Achieve and maintain a safety culture index in the survey top quartile
1.4	Eliminate critical safety risks, Critical Risk Incident Frequency Rate (CRIFR) ≤ 0.50
2	Close gender gap
2.1	25% women in manager positions and above ¹
2.2	Reach 0% gender pay gap across Sims Limited
2.3	Achieve representation of women on the board $\geq 40\%$
3	Develop a skilled and engage workforce
3.1	Maintain an engaged and satisfied workforce as demonstrated by employee engagement survey results in the top quartile
3.2	Invest in education by increasing the number of available career development training programmes by 50% and promoting them
3.3	Improve annual employee performance review process to align with Sims Limited's purpose; incorporate role competencies and skills development plan
3.4	Ensure management incentive plan is consistent with sustainability goals
4	Ensure transparency on how our business is conducted in an ethical manner
4.1	Train all employees and agents on our Code of Conduct, anti-corruption and anti-bribery policies
4.2	Provide all employees with training on human rights, modern slavery and labour rights to raise awareness and help fight human rights violations
4.3	Develop a supplier Code of Conduct and implement supply chain due diligence to identify and address high risk of human rights violations and unethical practices

CLOSE THE LOOP

5	Become carbon neutral by 2042 and achieve net zero by 2050
5.1	Reduce Scope 1 and 2 emissions by 23% by FY25
6	Achieve no waste to landfill
6.1	Build resource renewal capacity to transform 120k tonnes of ASR per year into new products
7	Close materials loops further by expanding capacity and services
7.1	Close loops by expanding secondary metal volumes
7.2	Recycle 200,000 tonnes of cloud material
7.3	Expand municipal recycling coverage by 50%
7.4	Capture methane from landfills outside Australia and New Zealand ²

PARTNER FOR CHANGE

8	Build trusted relationships with our communities
8.1	Establish at key sites a community index survey; track progress for continuous improvement
8.2	Annually, invest 0.5% of three-year rolling pre-tax profits in programmes that support environmental stewardship and economic empowerment
8.3	Dedicate paid employee time for community engagement/volunteerism activities
9	Create new business models that further the circular economy
9.1	Generate 10% of our EBIT from new business models and opportunities that enable the circular economy

- Strong earnings growth due to:
 - Lower operating costs, which are on track to achieve annualised cost savings in excess of \$70 million in FY21 compared to FY19; and
 - Margin improvement driven by active margin management and higher pricing; despite
 - Lower sales revenue and volumes

1) Underlying earnings excludes significant non-recurring items and the impact of non-qualifying hedges.

2) Annualised underlying EBIT / average of opening non-current assets and ending non-current assets excluding assets relating to adoption of AASB 16 Leases.

Markets

Meaningful price improvement in November and December 2020 but slight softening early 2021

Ferrous – Improved pricing since April 2020 lows

Non-ferrous – Improved pricing since April 2020 lows

Intake volumes remain at ~85% of the FY19 average

China Ferrous and Non-ferrous Reclassification

- China announced new regulations allowing high quality recycled ferrous to be freely imported from 1 January 2021
- Since 1 November 2020 recycled non-ferrous that meets quality standards can be freely imported into China without quotas

Underlying EBIT / tonne	-	11.4	NMF

- Underlying EBIT of \$24.6 million, up \$25.9 million over prior corresponding period on constant currency basis driven by:
 - Cost reduction initiatives; and
 - Improved margins and prices for recycled ferrous and zorba related products; despite
 - Lower volumes across both ferrous and non-ferrous
- Proprietary sales volumes were down 5.5% over prior corresponding period driven by slower economic activity largely due to COVID-19 impacts

North America – average monthly intake volumes²

Proprietary Sales Volumes ('000 tonnes)	806	807	0.1%
Underlying EBIT / tonne	27.7	34.2	23.5%

- Underlying EBIT was \$27.6 million, up 23.8% over prior corresponding period due to:
 - Higher margins on non-ferrous; and
 - Cost reductions in both fixed and variable terms
- Intake volumes declined over the prior year, however intake flows steadily improved as the period progressed
- Despite recently improved intake, competition for material remains high
- Proprietary sales volume was flat over prior corresponding period with continued strong demand from domestic mills

ANZ Metal – average monthly intake volumes²

1) Underlying earnings excludes significant non-recurring items, the impact of non-qualifying hedges and internal recharges.

2) Proprietary intake volumes.

UK Metal

Lower operating costs and higher volumes and margins delivered significant earnings improvement

Total Cloud Volumes (tonnes)³	13,300	10,400	-21.8%

- Underlying EBIT for remaining businesses was \$6.8 million, an increase of \$6.0 million over the prior corresponding period
- Operating profits from the sold European compliance scheme operations were included in the \$14.8 million 1H FY20 result
- Logistics disruptions and customer personnel availability, due to COVID-19, continued. This limited the ability to increase cloud material volumes in 1H FY21
- Innovation focus to re-use more parts and extract more value
- Commercial discussions, activity and interest remains robust

1) Underlying earnings excludes significant non-recurring items, the impact of non-qualifying hedges and internal recharges.

2) Excludes the sale of European compliance scheme operations.

3) Volumes differ from those disclosed at 1H FY20 due to final reconciliation of remaining businesses.

SA Recycling

Significant improvement due to increased volumes and higher margins

Corporate

- Corporate costs flat over prior corresponding period at constant currency

Sims Municipal Recycling

- Underlying EBIT loss of \$2.6 million driven by higher overtime and labour costs due to COVID-19 staffing shortages and increased residue rates and disposal costs

1) Underlying earnings excludes significant non-recurring items, the impact of non-qualifying hedges and internal recharges.

Operating Costs

On track for \$75 million of predominantly fixed cost savings in FY21 compared to FY19

1H FY21 Predominantly Fixed Costs^{1,2}

- Achieved FY21 annualised predominantly fixed cost savings of \$75 million compared to estimated \$70 million savings in FY21 vs FY19
- Note: \$20 million of these further cost reductions require implementation of the ERP system in order for them to be maintained

1) Approximately 70% of these costs do not vary materially within reasonable volume changes.
 2) Excludes Sims Lifecycle Services, Sims Municipal Recycling, Sims Resource Renewal and Sims Energy.

Net Cash Position

Strong improvement in net cash position

Other net cash flow from financing & FX	5.3
Change in net cash	55.0
Closing Net Cash	165.4

- Solid balance strength with net cash of \$165.4 million
- Working capital contributed \$20.9 million to operating cash flow due to increased payables from rising prices partially offset by higher inventory valuation compared to 30 June 2020
- \$63.7 million in capex primarily related to growth capital for the Enterprise Resource Planning system (ERP) and first Resource Renewal Facility

Capital Expenditure

Strong cash position enables strategic growth initiatives

- Forecast capex of \$140 million in 2H FY21 of which \$80 million is growth capex including the Alumisource acquisition
- Growth capex is focused on the ERP, growing ferrous and non-ferrous volumes and the first Resource Renewal Facility
- Net cash balance of \$165 million as at 31 December to support strategic growth initiatives
- Depreciation from existing assets and new capital expenditure expected to be approximately \$200 million for FY21, including \$75 million of right of use (leased) assets

Strategic Progress & Outlook

Alistair Field, Group CEO

Global ERP Implementation

Achieved key milestones for sales, outbound logistics and human resources

Business area	Milestones Achieved
 Sales and outbound logistics	Successful roll out in: <ul style="list-style-type: none">▪ Global Non-Ferrous Trading▪ North America Metal
 Human Resources	Prepared implementation to all regions and businesses in March 2021

Status Update

- Programme remains on budget
- Global inability to travel has necessitated rescheduling. For example bringing forward the successful roll out of sales and outbound logistics
- A complete replan for calendar 2021 and 2022 is underway using the assumption that travel restrictions will, at best, only slowly ease. Early indications are that timing will push out, but there will not be a budget impact

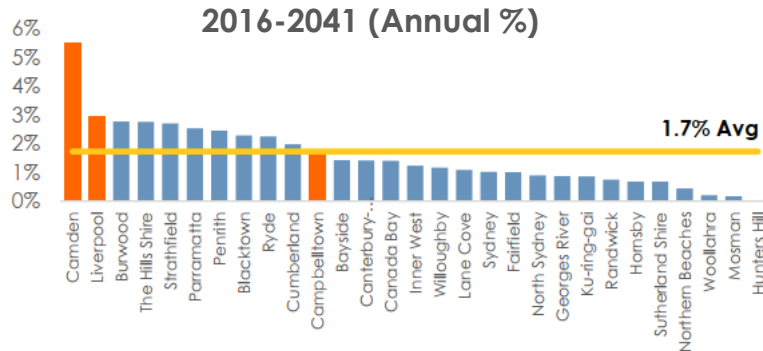

Strategic growth: Ferrous and non-ferrous

Identified and executed strategic growth opportunities in favourable geographies

Growing in Sydney with Minto site acquisition

- Establish presence in Sydney's rapidly growing Southwest market
- Turn-key ready facility with unique opportunity to meaningfully decrease start-up time and capital costs
- Good transport connections close to arterial roads and B-double rated access

Sydney Forecast Population Growth by LGA

Alumisource Corporation acquisition

- Leading aluminium processor with strong cultural fit on safety, product quality and sustainability
- Forecast to grow NAM non-ferrous retail volumes 24%

Non-ferrous Retail Volumes ('000 tonnes)

Sims Resource Renewal

Convert 1 million tonnes of ASR to quality products each year by 2030

Partner for Change: Community engagement

- Strong positive community and stakeholder engagement via virtual events and face to face where possible
- Virtual engagement event 2 is now [open](#) and includes initial facility building design concepts

Rocklea Pilot Facility

- Submitted development application
- Anticipating statutory planning approval mid 2021

Campbellfield Resource Renewal Facility

- Commercial demonstration:
 - Confirmed Sims ASR produces a high quality syngas
 - Confirmed chemical composition of syngas
 - Collected data for environmental and planning assessment processes
- Next stage gate identifies most suitable outputs from syngas and could include electricity, hydrogen or the building blocks for recycled plastic
- Progressing final stages of environmental and planning approvals for submission in Q2 2021

Conclusion & Outlook

1H FY21 result positions Sims well to implement strategic growth initiatives

1H FY21

- Significantly improved financial performance including higher margins and lower operating costs, which are on track to achieve annualised cost savings in excess of \$70 million in FY21 compared to FY19
- 1H FY21 proprietary intake volumes remained at 85% of average FY19 monthly volumes due to COVID-19 impacts, but increased 9% compared to 2H FY20 levels
- Substantial progress on implementation of strategic growth plans
- Transformative ERP implementation achieved key milestones in sales, outbound logistics and human resources

Outlook

- Signs of positive ferrous intake volume growth; January intake higher than January 2019 and 2020
- Retail non-ferrous intake volumes remain inconsistent; January intake lower than January 2020 but similar to 2019
- Ferrous liquidity and price volatility risks likely to persist in 2H FY21 but, over the medium term, prices should remain resilient due to infrastructure stimulus
- Global auto production is expected to return to normal and support zorba related prices
- China commenced the importing of high quality recycled ferrous. Volumes are starting to increase from a low base and may tighten demand / supply over the medium term
